COSMECEUTICAL FACIALS

By Janssen Cosmetics

Providing pharmaceutical grade skincare for every skin type.

The symbiosis of pharmaceutical and cosmetic active ingredients makes our products highly effective problem solvers. Our cosmeceuticals combine the best from the fields of pharmacy and cosmetics.

Our system care products are based on multiple, highly effective, and efficient active ingredients.

They enable the transition between pure beauty care and scientifically based skincare. Each of our cosmeceutical series is based on an active ingredient concept that is optimally tailored to a specific skin type in order to achieve visible as well as measurable results and to improve the respective skin appearance.

In order to achieve this, it is necessary that the products not only reach the skin's surface but also have a deep effect under the skin. The different demands and needs of the individual skin are specifically catered for.

To further enhance the effect of cosmeceuticals, we have a Professional range that is exclusively reserved for beauticians.

We leave no wish or need unfulfilled for the skin. We're the mature skin experts.
